Projects

Weather ☑

- Built a weather website by accessing data from an API that forecasts live weather updates.
- Created using React js, redux, RTK data-fetching tool to fetch data from API.
- Real time weather app that forecasts current, hourly and daily weather.

Recipe-book ☑

- I built a recipe, a single page application that allows users to prepare any dish they want.
- The website was created using React JS, React routers, Tailwind, and Firebase for authentication and backend.
- Users can create an account on the website and save their favourite recipes.

Twitter-clone ☑

- Built a twitter clone
- Created using React Js, React routers, Tailwind, firebase for authentication and backend.
- Allows user to post, follow, retweet and like a post.

E-commerce ☑

- Build an E-commerce website by fetching data from an API
- I have created this website using React js, Redux-toolkit, context API, react-routers, Sass preprocessor, and Firebase for authentication and database storage.
- The user can add items to the cart, save them, and sign in to save the cart to the database and can place an order.

Professional Experience

Appeals Analyst

Optum Global Solutions

2019-02 – 2021-03 | Hyderabad, India

Analyze and investigate appeals made by clients requesting to reconsider the rejected insurance claim. Based on the information I gather and company policy, a decision regarding which appeal should be accepted and which should be denied is made.
